

“Every e-bike that we design, develop, and produce goes to someone who is happy about it. Together with you, we want to create this joy and make it a unique experience.”

Dr Sandra Wolf, CEO

Dear Dealer,

The new model year marks an important milestone for the bike industry. We are confident that we can now look ahead again and actively shape the future.

In this brochure, you will find all the information about our new products, services, and any important updates or changes to your annual agreement for the change in the model year.

We have actively taken your feedback on board and continued to develop several aspects of our collaboration. Tried-and-tested approaches have been retained, while adding sensible optimisations to them. High levels of price stability across almost all models counteract the ongoing price war.

You can expect a lot from us this year, especially in terms of products. Following last year's focus on reducing excess stock in a responsible, resource-conscious way that also conserves resources, the 2026 model year is all about driving innovation and technology forward.

Many models will benefit from well thought-out component and design upgrades in the coming model year and are therefore, ideally positioned for the new season. Our cargo bikes in particular, whether Longjohn or Longtail, make it easy to switch to sustainable mobility thanks to a comprehensive range of accessories and new colours.

The 5th generation of Charger and Nevo combines the latest technology with the tried-and-tested qualities of our two top sellers. Both models define an entire category and embody iconic design and the precise riding experience that characterises the Riese & Müller premium standard.

Best regards from Mühlthal

Timo Gührer
Chief Sales Officer

EUROBIKE 2025

New points of view.

Growing together.

The bicycle industry has changed dramatically in recent months – perhaps even faster and more profoundly than many of us expected. Between growing stock levels, intense competition and customers who are sensitive to prices, we are all acutely aware that simple answers rarely suffice.

We have also gained experience, made price corrections and asked ourselves one particular question again and again: How can we, together with our dealers, ensure long-term success without being driven out due to price pressures?

Our answer is clear: by creating spaces for real collaboration. For differentiation. For sustainable growth.

We would like to invite you personally to EUROBIKE 2025 in Frankfurt.

The trade fair is a crucial moment for us to show you where our common journey can lead and why we are convinced that retail will remain the centrepiece of our brand in the future.

You can look forward to:

- **Product innovations that are not only technically impressive, but also sell well.**
- **Service and technology solutions that make your day-to-day work easier.**
- **New concepts for collaboration based on trust, fairness and common goals.**

And above all: time for open discussions, individual questions and new ideas.

We want to do more than just offer new models. Together with you, we want to consider how we can better position ourselves in a changing market – as a manufacturer, as a dealer, and as partners with a clear, shared vision.

It means a lot to us if you take the time to visit our booth. Not only as a sign of partnership, but also as a starting point for a new phase that we can shape together.

As a special thank you, we are offering you an exclusive 50 % voucher for one-day admission to EUROBIKE for you and your employees. Simply enter the voucher code EB25R-M during the purchase process.

We look forward to your visit.

New products for the 2026 season

We have revised two of our most successful models from the ground up — reaching new levels in development and intelligence down to the smallest detail, including top-quality components. The Charger5 and Nevo5 define an entire category, combining iconic design with the premium Riese & Müller riding experience.

At the same time, we have equipped the Delite5, Load5, Multicharger3, Multitinker2, Carrie2 and Swing5 models with the latest Bosch drive generation. This pioneering technology forms the basis for subsequent motor updates and performance enhancements.

We have also further simplified model selection and aligned it more closely with our customers' needs. The new configuration process with Cargo kits and a streamlined configuration structure makes the consultation and selection processes easier.

cycling unites

The new Charger5.

Confident, agile, precise

1 Riding dynamics
Maximum performance and
a safe riding experience.

2 Proven bestseller
Inspiring worldwide
since 2015.

3 Best-in-Class
High-quality components
and simple elegance.

4 Easy to sell
The perfect e-bike for
a simple consultation.

“The design is strongly orientated towards the front. This gives it a dynamic appearance, even when it is stationary. This is what gives the frame its visual identity.”

Steffen Hellmann, Industrial Designer, Innovation & Development

"When developing an e-bike, it is important that Design and Engineering work closely together and combine the visual with the technical. With the Charger5 this has been achieved to perfection, down to the last detail."

Steffen Hellmann, Industrial Designer, Innovation & Development

*“The Charger5 is an ergonomic bike
that we offer for almost all body sizes.*

*The geometry is designed in such a way that there is a lot of pressure
on the front wheel, leading to a very short braking distance, yet still
leaving enough load on the rear wheel.”*

Uwe Hoffmann, Test Rider, Innovation & Development

*“You feel like you’re on rails
when riding round long bends –
stable and controlled. At the same time, the bike
demonstrates its manoeuvrability in tight bends. It combines
the riding characteristics of a modern mountain bike with the
relaxed seat position of a touring bike.”*

Uwe Hoffmann, Test Rider, Innovation & Development

Highlights

Design The new Charger5 sets new standards in design. It owes its high-quality appearance to the polished weld seams in the visible area and the aluminium battery cover painted in the same colour as the frame.

Multi-drive The frame is compatible with different drive systems – without changing the motor bracket or the down tube. This means that both the latest Bosch motors and the Pinion MGU can be installed. This enables demand-orientated production – and thus saves resources.

Highlights

Frame sizes The revised geometry makes additional frame sizes possible: the range now extends from 45 cm to 58 cm, offering the right size for even more riders.

Frame geometry The revised geometry combines improved riding stability and directional stability with noticeably more manoeuvrability and agility. The result is intuitive riding behaviour that ensures safety and riding enjoyment on any terrain. The modern, relaxed and sporty seat position ensures optimum weight distribution and therefore maximum control and a superior riding experience.

Battery cover The newly designed aluminium battery cover, painted in the same colour as the frame, impresses with its high-quality feel. It is fully removable, locks securely, and reliably protects the frame — even when the battery is removed, such as during transport. For added convenience, the cover includes mounting points for an optional Range Extender. The battery can be conveniently and intuitively removed from the top.

Highlights

Battery Depending on the drive system, Bosch PowerTube 600, Bosch PowerTube 800 or FIT Tubepack 800 are fully integrated in the down tube.

Drive The choice is yours: Bosch Performance Line PX (BDU347Y), Bosch Performance Line CX (BDU384Y), Bosch Performance Line Speed (BDU388Y) or Pinion MGU E.112 and E.112 S.

Charging The charging socket is ergonomically positioned in the top tube for easy access. The new, flat design impresses with a magnetic locking mechanism.

Highlights

Tires Standard 27.5" tires

Display Always in full control thanks to Purion 200, Kiox 500 or FIT Remote + Comfort display

Lighting High-quality Supernova headlights ensure a safe ride in all light conditions.

Mudguards Sturdy aluminium mudguards with a matt black finish provide optimum protection from dirt and moisture.

Highlights

Carrier Thanks to the MIK HD system, a basket or child seat can be attached in no time at all. There is space for panniers on the additional struts. A sporty pannier rack is also available as an alternative – the ideal setup for daily commuting in combination with the new Vaude panniers.

Front luggage carrier with bag
Ideal for smaller luggage.

Highlights

Connectivity The bike is always connected with the standard RX Chip (Europe-wide) and you can access important bike data at any time. Built-in anti-theft protection with GPS tracking and motion alarm protects your bike from unauthorised access and theft.

Insurance coverage included When you purchase the bike, connectivity and comprehensive ConnectCare Free insurance coverage are included for one year. This means that, after registering your bike and activating your account, you benefit from an all-round no-hassle package that is easily and immediately accessible – from your first ride.

Lock bag Standard chain lock and Vaude bag with Rolltop fastener

The Charger5 in presale

Present the first bikes in your shop as early as July – in limited quantities and fixed configurations.

The regular delivery of the Charger5 will start in September, but a limited number of bikes with fixed configurations are available now as a one-day order in my Riese & Müller. It pays to be quick.

Perfect if you want to offer your customers the first innovations right now. The visibility of the Charger5 is supported by strong communication around the Eurobike.

The new Nevo5.

Iconic, comfortable, coveted.

1 Distinctive and full of character
Iconic frame design with recognition value.

2 Comfortable low-step-through bike
Outstanding riding characteristics without compromising on handling and comfort.

3 Strong in sales
Bosch or Pinion: multi-drive frame for maximum flexibility in consultation.

4 All-rounder with character
Powerful, safe and versatile – the ideal everyday e-bike.

"It was clear to us that the L-shape has a high recognition value. The look makes the Nevo unique in a highly competitive market."

Claudius Bock, Industrial Designer, Innovation & Development

*"The Nevo is a low-step-through bike with many uses:
It is great in the city, but can also
hold its own off-road."*

Uwe Hoffmann, Test Rider, Innovation & Development

*"Comfort doesn't just mean riding comfort,
but also simple handling."*

Claudius Bock, Industrial Designer, Innovation & Development

"The Nevo is a modern pedelec that breaks with the usual conventions of a low-step-through bike: it works well for everyone."

Claudius Bock, Industrial Designer, Innovation & Development

Nevo5 pinion HS / ice blue / 46 cm

Nevo5 touring / ruby red / 46 cm

Nevo5 vario / pure white / 46 cm

Nevo5 rohloff / slate grey / 46 cm

Highlights

Frame geometry The unique geometry combines expressive design with high riding dynamics. The reliable low-step-through bike is extremely comfortable and easy to handle. Whether fast downhill, with a lot of luggage or in bends: thanks to its stiff frame, the Nevo5 always confidently stays on course.

Battery compartment cover in frame colour The battery can be removed intuitively and safely from the top. The battery compartment can also be closed when the battery has been removed.

Design The new design language is based on the Control Technology models and combines the series with clear recognisability. Characteristic design elements of earlier Nevo generations have been retained and interpreted in a modern way – simple elegance meets sporty comfort.

Frame sizes The revised geometry and size distribution create an optimal riding experience for body sizes up to 205 cm. Finely tuned adjustments to the tried-and-tested geometry ensure even greater riding stability and safety.

Colours Iconic: the Nevo5 continues to impress with its high-quality two-tone paint finish.

Highlights

Drive The choice is yours: Bosch Performance Line PX (BDU347Y), Bosch Performance Line CX (BDU384Y), Bosch Performance Line Speed (BDU388Y) or Pinion MGU E.1.12 and E.1.12 S.

Battery Depending on the drive system, Bosch PowerTube 600, Bosch PowerTube 800 or FIT Tubepack 800 are fully integrated in the down tube.

Multi-drive The frame is compatible with different drive systems – without changing the motor bracket or the down tube. This means that both the latest Bosch motors and the Pinion MGU can be installed. This enables demand-orientated production – and thus saves resources.

Charging The charging socket is ergonomically positioned in the top tube for easy access. The new, flat design impresses with a magnetic locking mechanism.

Highlights

Display Always in full control thanks to Purion 200, LED Remote + Kiox 500 or FIT Remote + Comfort display.

Lighting High-quality Supernova headlights ensure a safe ride in all light conditions.

Mudguards High-quality plastic mudguards provide excellent protection against splashes and dirt.

Highlights

TIM

Lock bag Frame lock with chain lock and Vaude bag with Rolltop fastener as standard.

Integrated luggage carrier with MIK HD system. A shopping basket or child seat is quickly attached and thanks to additional struts there is also space for panniers.

Connectivity The bike is always connected with the optional RX Chip and you can access important bike data at any time. Built-in anti-theft protection with GPS tracking and motion alarm protects your bike from unauthorised access and theft.

Tires We are now also fitting 27.5" tires to the smallest frame size.

Delite5: Four new variants

More Riese & Müller is not possible.

Together with the bikes in the Control Technology family, the Delite5 is one of the technological frontrunners in our range. From MY26, the multi-drive design of the Delite5 also allows for the configuration of the latest generation Bosch Performance Line CX / Speed motor in the rohloff, rohloff HS, vario, and touring variants, as an alternative to the Pinion MGU.

In action

French model and cyclist Anthony Richelot (@nthnyrcht, 63.8k followers) is part of the Riese & Müller community. With a flair for design, performance and modern mobility, he shows how versatile our e-bikes can be for everyday and leisure use. Values that the Delite5 also unites in a special way.

International

Popular for long-distance commuting in Belgium.

Sustainability

The frame is manufactured in Europe and contains ASI-certified recycled aluminium (38%).

Bosch Performance Upgrade

The Delite5 models with Bosch motor are approved for the Bosch Performance Upgrade.

Superdelite5: a new variant

The maximum as the benchmark.

The Superdelite5 has been stringently developed for long distances and with Riese & Müller Control Technology and 1200 Wh battery capacity, fulfils all wishes in terms of comfort and range. From MY26, the Endurance Bike can also be configured as a fast S-Pedelec with the powerful Bosch Performance Line Speed motor and rohloff gears. The Schwalbe Super Moto-X will be the standard tires. The new shadow variant harmoniously rounds off the colour range.

Superdelite5 rohloff HS / shadow / ⌀ 56 cm

In action

"Takes adventure to a new level", headlines the Spanish magazine MountainBIKER in its test report on the Superdelite GT rohloff.

International

A customer favourite in the United Kingdom.

Sustainability

The frame is manufactured in Europe and contains ASI-certified recycled aluminium (39%).

Bosch Performance Upgrade

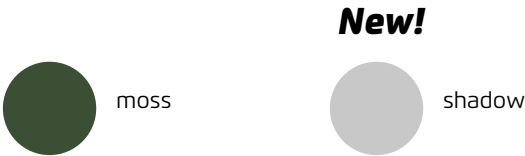

All Superdelite5 models are approved for the Bosch Performance Upgrade.

The new Multicharger3 and Multicharger3 Mixte

Transporters for adventure and everyday life.

The new desert frame colour and the upgrade to the new Bosch Performance Line CX motor set the Multicharger up perfectly for the new season. Practical, pre-configured Cargo kits facilitate consultation and sales. Also now included as standard is the high-end Supernova Mini 3 Pro front light.

For those who want to go even further or higher, the optional Bosch PowerMore 250 Wh add-on battery increases the range.

Multicharger3 vario / desert / black matt / $\approx$ 51 cm
Optional Equipment: Passenger kit

Multicharger3 Mixte vario / desert / black matt / $\approx$ 47 cm

In action

Spanish lifestyle and content creators Maria Pombo and Pablo Castellano @pablocastellano86 (585k followers)/ @mariapombo (3.3 million followers) use their bikes for daily adventures with their children.

International

The top seller in Oslo and sales rank 4th worldwide.

Sustainability

Textiles (child seat cushions, lock bag, accessory bags) are made from recycled material, can be repaired and disposed of separately.

Bosch Performance Upgrade

The Multicharger3 and Multicharger3 Mixte models are approved for the Bosch Performance Upgrade.

The new Multitinker2

As diverse as life itself.

For the start of the MY26, the practical 20" longtail has been updated with the new Bosch Performance Line CX motor and comes in two new frame colours: lava and olive. The FAMILY variant is equipped with the new Bosch Performance Line PX motor and a comprehensive range of accessories for transporting children – for uncomplicated entry into the world of cargo bikes.

Multitinker2 vario / olive / black matt / ⚡ universal
Optional Equipment: Passenger kit, front luggage carrier with bag

Multitinker2 vario / lava / black matt / ⚡ universal
Optional Equipment: Family kit

In action

Spanish national handball goalkeeper Gonzalo Pérez de Vargas @perezdvargas (99.8k followers) will soon be moving to Kiel, where he will continue travelling with the Multitinker.

International

The most successful model in Paris.

Sustainability

Textiles (child seat cushions, lock bag, accessory bags) are made from recycled material, can be repaired and disposed of separately.

Bosch Performance Upgrade

The Multitinker2 models are approved for the Bosch Performance Upgrade.

The new Carrie2

Compact, flexible, sustainable.

Maximum benefit in minimum space: in the MY26, the popular compact cargo bike comes with exciting updates: the new Bosch Performance Line PX motor immediately supports pedalling power with a full 85 Nm when setting off. The Supernova Mini 2 headlight ensures better visibility in the dark. The standard zip door makes access to the Flex Box convenient for children and dogs.

New: The automatic model variant with Enviolo Automatiq gears and the vibrant coral colour option. Pre-configured equipment packages (Cargo kit, Family kit and Dog kit) make consultation and selection easier. The new Offroad kit makes the Carrie2 suitable for off-road use.

Carrie2 city / coral /  universal

Optional Equipment: Dog kit, Offroad kit, suspension seat post

In action

Belgian founder of "GoFluo", a brand for reflective outdoor clothing, Julee Vets (26.3k followers) regularly uses Carrie to create content for her products.

International

The most popular bike in Australia.

Sustainability

Winner of the German Sustainability Award 2025.

The frame is manufactured in Europe and contains ASI-certified recycled aluminium (81%).

Bosch Performance Upgrade

All Carrie2 models are approved for the Bosch Performance Upgrade.

Eagerly awaited: The new Carry2 now features a practical entry and exit aid for passengers with two or four legs.

The new Load5 60/75

The “do it all” cargo bike.

The Load combines the highest standards of style, safety, state-of-the-art technology and a sporty riding experience – whether alone, with three children or lots of luggage. With the motor update to the new Bosch CargoLine, the optional Magura IBS brake force distributor and RX Chip as standard, the popular Long John is taking a big step into its fifth generation.

The 2026 model also comes with a dropper seatpost as standard and is available in the new colour arctic.

New: The DualBattery Option with two PowerPack Frame 800 Wh batteries increases the maximum battery capacity to 1600 Wh. The Performance kit with customisable air suspension elements makes the Load5 even lighter and more powerful.

Load5 60 rohloff / arctic / ⚡ universal

Load5 75 vario / arctic / ⚡ universal
Optional Equipment: Family kit Plus, Offroad kit

In action
German former professional cyclist Simon Geschke @simongeschke uses the bike to extend his cycling ambitions for everyday errands.

International
The most popular cargo bike in San Francisco.

Sustainability

Bosch: Innovations for the smart system

All e-bike models from the 2026 model year are equipped with the latest Bosch Smart System motors. They offer maximum efficiency, smart connectivity, a natural riding experience and full compatibility with the latest software updates – for maximum future-proofing and an even better riding experience.

With the free Performance Upgrade, Bosch is taking the Performance Line CX, PX and SX (Smart System) motors to a new level: up to 100 Nm torque and 750 W peak power ensure noticeably more dynamism and powerful starting. Available from July 2025 via the Bosch eBike Flow app.

The Pinion e-drive system

Motor and gears in a single unit: the Pinion MGU (“Motor.Gearbox.Unit”) is the next-generation of e-bike technology. It combines a powerful electric motor with proven Pinion gear technology and electric shifting to create a completely new drive system. It delivers harmonious power matched to the gear,

combined with trouble-free gear shifting performance in a class of its own. FIT, the integration expert for peripheral products and service structure, works closely with Pinion. Its modular e-system includes displays, controls and batteries, digital services, accessories and a proven service for dealers.

Pinion MGU E1.12 Performance and E1.12 Speed

- Powerful mid-motor and electronic 12-speed gear
- Natural riding experience
- Gear shifting both when stationary and under full load
- 600% gear bandwidth
- Closed, low-maintenance system

TE1 E-Trigger

- Optimum haptics and ergonomics

Remote control unit

- Slim design
- Lit buttons

Remote Display Comfort and Remote Display

- Good readability in all lighting conditions
- Lit buttons
- High display resolution

Tubepack 800

- Latest generation lithium-ion battery with 800 Wh
- Overload protection

FIT Services

- FIT Maintenance Tool: e-bike diagnostics and updates
- FIT E-Bike Control App (for end customers): motor settings, navigation, bike locking and much more.

Accessories

Flexibility for every target group

With the right accessories, every e-bike becomes a customised solution – whether for carrying children, transporting goods or as an everyday companion. As every customer has different requirements, we have developed a versatile range of accessories. This means that Riese & Müller e-bikes can be customised and flexibly extended to suit individual purposes. This is a strong sales argument for individual advice and customised mobility solutions.

Accessories

Flexibility for every target group

Vaude panniers

Suitable for all e-bikes and cargo bikes.

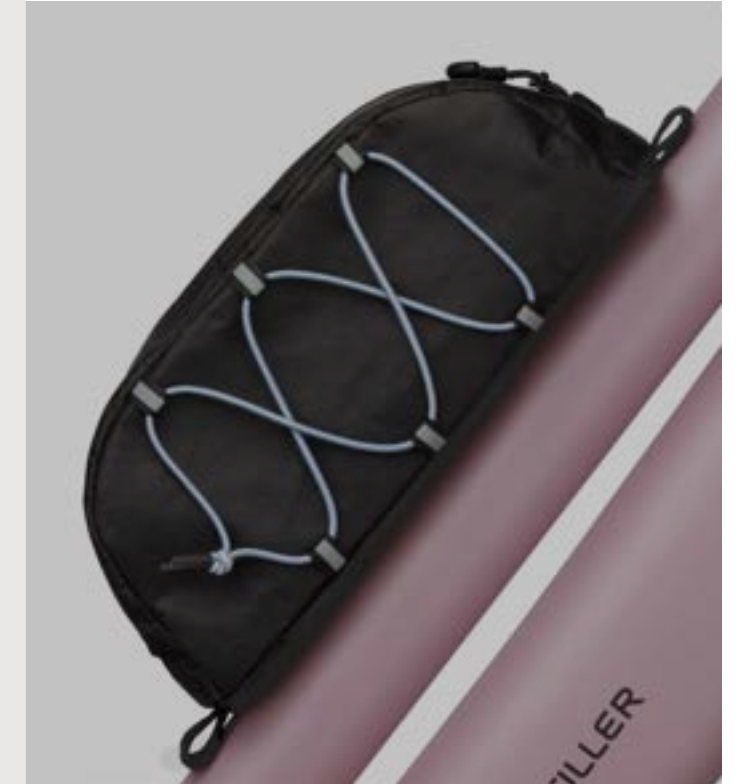

With a capacity of up to 22 litres and waterproof material, the bag offers plenty of space and protection. A practical inner pocket keeps small items such as mobile phones secure. Developed in cooperation with Vaude, the pannier is made from recycled material. For a high-quality, stylish overall look, the design is perfectly coordinated with the lock chain bag.

Frame bag

Culture / Culture Mixte / UBN Five / UBN Six / UBN Seven

This practical, waterproof bag provides a secure storage space for small items. Thanks to the elasticated closure, light items are always within easy reach. The bag is functional and sustainable, as it is made from 100% recycled polyester obtained from plastic bottles.

Dog kit

Carrie

The padded mat protects the loading area from water and dirt. An integrated hook strap secures your dog in the box and prevents them from jumping out unintentionally. The standard zip at the front makes it easy to get in and out. The materials used are recycled and dyed using an environmentally friendly process (Solution Dyeing).

Child cover

Load5 60/75

Effective protection against wetness and intense sunlight: tinted TPU film windows provide increased UV protection while ensuring pleasant lighting conditions. The system is easy to open and close. It is made from recycled main material and recycled straps in Solution Dye quality for maximum functionality and sustainability.

Cargo kits

What combinations of accessory options are most frequently configured on Riese & Müller cargo bikes? The result of these questions and targeted analyses are five simple accessory packages that your customers can

grasp intuitively. This makes the range clearer – and gives you a useful tool for your sales advice.

	Cargo kit	Family kit	Family kit Plus	Dog kit	Passenger kit
Load5 60	High side walls Tarpaulin	Low side walls Child cover Two child seats Carrier		Low side walls Dog cushion Safety belt Glove compartment

RX Connect

Innovative technology, digital features and premium services: we build smart e-bikes for the mobility of the future. The seamlessly connected riding experience with the RX Chip and comprehensive services is a veritable success model.

RX Chip

The RX Chip is included as standard in many of our models or can be configured as an option depending on the model – throughout Europe.

Standard integration

The following models will be equipped with the RX Chip as a standard component from model year 2026 onwards: Delite5, Superdelite5, Homage5, Charger5, Load5, UBN Five / Six / Seven, Packster2 70 (CT)

RX Chip retrofit

From now on, you can retrofit the RX chip to almost all Riese & Müller e-bikes with the Bosch Smart System, and enjoy one year of ConnectRide Free.

RX Services

RX Services (ConnectRide) can be booked for all models in the MY26 throughout Europe and in the United Kingdom.

RX Connect app

RX

The free RX Connect app is the mobile cockpit for Riese & Müller e-bikes. When the RX Service is booked, the app connects to the bike and displays the location, tours travelled and extensive riding statistics – reliably recorded by GPS in the bike. Additional live driving data is available for all Bluetooth-enabled models. If required, the bike can be secured with the digital motion alarm.

New app functions

- **Share live location:** The bike's live location can be easily shared with other devices via a link. This allows bike owners – and other people if required – to keep an eye on the bike's location at all times.
- **End tours:** An active tour can now be ended directly in the tour view – more easily and quickly than before.
- **Tour optimisation:** Tours travelled are recorded even more precisely.
- **Bluetooth connectivity:** For all Riese & Müller e-bikes with the smart system from Bosch.

New in MY26

- **Home screen** Widget iOS users can display key information and the interactive lock button as a home screen widget on their smartphone.
- **Help Center** AI-supported support answers all questions about RX Connect directly in the app.
- **Redesign** With the update to version 3.0, the RX Connect app will undergo a complete facelift. We are taking the appearance and user experience of the RX Connect app to a whole new level. The new interface will be clearer, more functional and more personalisable.

Preliminary layouts

The new Riese & Müller annual agreement and joint order planning.

Period: 25 June to 12 September 2025

With our order planning as part of our customised annual agreement, we offer you a range of benefits:

- **Classic or Flex order planning:** Benefit from the best discounts and maximum flexibility throughout the model year.
- **Flexible conditions:** The conditions are based on the order planning or the jointly agreed target quantity. If the target quantity is reached, we will even increase your discount level. If you do not reach the target quantity, we will only charge a fee for each bike not ordered.
- **Increased discount on test bikes:** The range of test bikes and their configurations have been significantly optimised. The additional discount for test bikes increases from 5% to 12%. If our selection is not the perfect fit, please feel free to contact our sales team and we can find a solution together.
- **New order planning:** When submitting the order planning, you can choose whether you wish to order individual sales bikes as “changeable” or “non-changeable”. New: You can adjust the configuration of changeable sales bikes up to approx. 2 instead of 4 weeks before delivery. It is possible to bring forward the delivery date at any time.
- **Delivery times:** Sales bikes can be ordered for the delivery months of January to May and for delivery as soon as possible. Please note the cancellation deadlines.
- **Mobility bikes and staff bikes:** The additional discounts will be increased from 12% to 20%. We offer you a long payment term until the end of May 2026 for mobility bikes.

You can find all the details in the new annual agreement for the 2026 model year.

With the help of our new [Sales Advisor](#) you can quickly access all the important information in our agreement.

Riese & Müller Sales Advisor

Our Sales Advisor, powered by OpenAI's ChatGPT technology, provides simple, clear answers to your most important questions about the annual agreement via chat. It helps you select the right store concept and appropriate condition level, recommends suitable test and sales-bikes based on your target group and location, and provides a practical order planning checklist. A free ChatGPT account is required to use the service. Use of the service is subject to the terms of use and privacy policy of OpenAI/ChatGPT. Riese & Müller does not provide or operate the Sales Advisor, but refers to the possibility of using this external platform. Please note that answers from an AI can always be incorrect.

Checklist for 2026 model year

A successful start together – your guide to the annual agreement

✓ Conclude partner agreement

- Period: 25 June to 29 September 2025
- Finalisation via my Riese & Müller > My account
- Order planning is only possible once a partner agreement has been concluded

✓ Choose the right order planning

- Classic: planned delivery dates with attractive additional discounts
- Flex: additional leeway thanks to daily orders for target quantities
- Target quantity must be reached by 23 June 2026 to avoid fees

✓ Define order level

- Depending on your planned total quantity
- The benefits for you: discount levels of 3–9% plus attractive additional discounts

✓ Select test bikes

- At least 8 models (Authorised Dealer) or a defined selection depending on the store concept
- Can be viewed on r-m.de via your test bike categories

✓ Plan your sales bikes early

- Delivery dates selectable from January to May 2026 or “as soon as possible”
- Configuration can be changed up to 14 days before delivery (if selected)
- Please note cancellation deadlines and costs

✓ Secure staff & mobility bikes for your team

- Attractive special conditions with additional 20% discount
- Order via discount codes on my Riese & Müller
- Mobility bikes to remain in use until 31 July 2026

✓ Choose store concept

- Authorised Dealer, Experience Store (from condition level 2) or Cargo Hub (from condition level 1)
- Both concepts can be combined
- The benefits for you: visibility, equipment, training and support at events

✓ Become a Service Hub and benefit

- Participation in online shop, subscription and factory outlet processes
- Remuneration for services such as advice, test ride, handover and return
- Attractive performance-related remuneration of up to 75% of the base margin depending on role and activity

✓ Take advantage of our assembly and delivery service

- Ready-to-ride bikes and Home Delivery possible
- Packages: €150 for e-bikes / €250 for cargo bikes, plus €25 for direct delivery

✓ Work together on the brand image

- Store modules with up to 70% subsidy
- Planning and realisation with the Brand Implementation Team
- Training courses, factory tours, event formats – for your entire team

Welcome to Mühlthal

Our campus in Mühlthal near Darmstadt is the place where we customise every Riese & Müller premium e-bike. You can experience here what we stand for: hospitality and togetherness, loyalty and longevity. Anyone who has ever been with us realises that here you are among friends, here you walk paths together. This model year, we are opening our doors even wider to you and your customers – more training courses, more factory tours, more transparency.

Sustainable campus

Our Riese & Müller Campus is surrounded by nature on the edge of the Odenwald. The buildings are constructed using ecological construction methods. Our solar system generates more than half of the electricity we need directly. In our buildings on the mountain you can enjoy the best coffee specialities and freshly cooked, seasonal-regional meals during your visit.

Dealer Academy

During intensive sessions, we provide you with detailed knowledge about Riese & Müller and the life cycle of our e-bikes and cargo bikes. These measures support team building and the friendly, professional atmosphere helps to clear the mind for everyday business life.

Guided factory tours

Whether with your team or with your customers – a factory tour at Riese & Müller will amaze many people. Here you can experience what “Made in Germany” means and see how sustainable business can succeed. Your employees hear the stories that help them sell our products and customers see where “their” bike was built. On the Riese & Müller Campus, you can discover numerous examples of responsibility in action, such as the BikeBox – our reusable packaging for e-bikes.

Reusable packaging

We are the first manufacturer in the bike industry to use reusable packaging as standard for the Europe-wide dispatch of e-bikes for one-day orders – it protects the bike better during dispatch than conventional cardboard packaging and saves considerable amounts of waste in retail. We also use reusable packaging for shipping small parts in Germany.

Responsible procurement

We attach great importance to high-quality, healthy and resource-saving materials. We source around 60% of our components from suppliers in Europe. As an industry pioneer, we have worked with partners from Portugal to incorporate recycled aluminium into our frame models. We use over 80% ASI-certified recycled aluminium in the Carrie compact cargo.

We look forward to
welcoming you and your
teams to our campus.

Meetings on campus are all about sharing and working together.

Let's kick off the new 2026 season
together and inspire your customers.

RIESE & MÜLLER

Footnotes

¹ Including VAT

² Excluding VAT

* The HS (high-speed) models provide assistance of up to 45 km/h and require an insurance certificate.

** Please refer to the online configurator for accurate information on the bike's accessory combination options.

*** Price reduction compared to MY 2025
